Preface	xi	5.5.1. Antibodies and antigens	25
Editor and Contributors	xiii	5.5.2. Immune response	25
Acknowledgements	xv	5.5.3. Acute and convalescent paired serum	26
<b>I. INTRODUCTION</b>	<b>1</b>	5.5.4. Avidity of antibodies	27
<i>D. Lepur, L. Stemberger Marić</i>		5.5.5. Methods in serological diagnostics	27
<b>1. The importance of infectious diseases</b>	<b>2</b>	5.5.6. Confirmatory serological testing	28
1.1. Emerging and re-emerging infectious diseases	3	5.5.7. Oral fluid antibody detection	28
1.2. Infectious causes of chronic and malignant diseases	3	5.5.8. Interpretation of serological diagnostics results	28
1.3. Systemic diseases caused by infections of the oral cavity	4	5.6. Diagnosis of viral infections	29
<b>2. Epidemiology of infectious diseases</b>	<b>6</b>	5.7. Diagnosis of fungal infection	32
2.1. Basic epidemiological terms in infectious diseases	8	5.7.1. Yeasts	33
<b>3. Basic terms and definitions</b>	<b>10</b>	5.7.2. Moulds	33
		5.8. Diagnosis of parasitic diseases	33
<b>II. MICROBIOLOGICAL DIAGNOSTICS</b>	<b>13</b>	<b>III. MEDICAL HISTORY AND PHYSICAL EXAMINATION</b>	<b>37</b>
<i>O. Đaković Rode</i>		<i>D. Lepur, L. Stemberger Marić</i>	
<b>1. Introduction</b>	<b>14</b>	<b>1. Current illness</b>	<b>39</b>
<b>2. Specificity of oral cavity infections</b>	<b>14</b>	<b>2. Preceding illnesses</b>	<b>39</b>
<b>3. Samples for microbiological diagnosis</b>	<b>15</b>	<b>3. Treatment of current illness</b>	<b>40</b>
<b>4. Microbial aetiology of oral infections</b>	<b>16</b>	<b>4. Past and chronic diseases</b>	<b>40</b>
<b>5. Diagnostic methods in clinical microbiology</b>	<b>18</b>	<b>5. Treatment of chronic diseases</b>	<b>41</b>
5.1. Antimicrobial susceptibility testing (AST)	20	<b>6. Drug exposure and allergies to medications</b>	<b>42</b>
5.2. Molecular methods in microbiology	21	<b>7. Patient travel and exposure history</b>	<b>42</b>
5.2.1. Polymerase chain reaction	22	<b>8. Vaccination history</b>	<b>43</b>
5.3. Mass spectrometry (MS)	24	<b>9. Specifics of paediatric medical history</b>	<b>43</b>
5.4. Rapid diagnostics (point-of-care testing)	24	<b>IV. HEAD, NECK, AND ORAL CAVITY INFECTIONS</b>	<b>45</b>
5.5. Serological diagnostics	25	<i>D. Lepur</i>	
		<b>A. ORAL CAVITY INFECTIONS</b>	<b>46</b>

## INFECTIOUS DISEASES

<b>1. Odontogenic infections of the oral cavity</b>	<b>46</b>	<i>Herpangina</i>	76
1.1. Dentoalveolar infections	48	<i>Hand-foot and mouth disease (HFMD)</i>	76
1.1.1. Dental caries	48	2.2.2. Bacterial tonsillopharyngitis	77
1.1.2. Pulpitis (endodontitis)	48	<i>Streptococcal angina</i>	77
1.1.3. Periapical abscess	48	<i>Scarlet fever (scarlatina)</i>	81
1.2. Periodontal infections	49	<i>Plaut-Vincent's angina</i>	82
1.2.1. Gingivitis	49	<i>Diphtheria</i>	82
<i>Drug-induced gingivitis</i>	50	2.2.3. Non-infectious pharyngitis and sore throats	83
<i>Gingivitis associated with malnutrition</i>	50	2.2.4. Tonsillectomy	84
1.2.2. Pericoronitis	50	2.3. Infections of the salivary glands	84
1.2.3. Periodontitis	51	2.3.1. Parotitis	84
1.3. Complications of odontogenic infections	52	<i>Epidemic parotitis (mumps)</i>	85
1.3.1. Infections of deep fascial spaces	53	<i>Acute bacterial (suppurative) parotitis</i>	86
<i>Spaces in the facial area</i>	54	<i>Chronic bacterial parotitis</i>	86
<i>Spaces in the suprahyoid region</i>	57	<b>B. LYMPHADENOPATHY</b>	<b>87</b>
<i>Spaces in the infrahyoid region</i>	61	<b>1. Introduction</b>	<b>87</b>
1.3.2. Other complications due to the direct spread of orofacial infections	62	<b>2. Infectious mononucleosis</b>	<b>88</b>
<i>Suppurative thrombophlebitis of the internal jugular vein (Sy Lemierre)</i>	62	<b>3. Cat-scratch disease (CSD)</b>	<b>88</b>
<i>Carotid artery erosion</i>	62	<b>4. Toxoplasmosis</b>	<b>89</b>
<i>Maxillary sinusitis</i>	63	<b>5. Mycobacterial lymphadenitis</b>	<b>89</b>
<i>Osteomyelitis of the jaw</i>	63	<b>6. Tularaemia and plague</b>	<b>89</b>
<i>Septic thrombosis of the cavernous sinus</i>	63	<b>7. HIV disease</b>	<b>90</b>
1.4. Indications for the referral of patients with orofacial infections to a hospital	64	<b>8. Other regional lymphadenitis</b>	<b>90</b>
1.5. Antimicrobial treatment of suppurative head and neck infections	65	8.1. Axillary lymphadenitis	90
		8.2. Intrathoracic lymphadenopathy	91
		8.3. Abdominal lymphadenopathy	91
		8.4. Inguinal lymphadenitis	91
<b>2. Non-odontogenic infections of the oral cavity</b>	<b>66</b>	<b>C. INFECTIONS OF THE EYE</b>	<b>92</b>
2.1. Stomatitis and other infectious diseases of the oral cavity	66	<b>1. Infections of the lids</b>	<b>93</b>
2.1.1. Gangrenous stomatitis (Noma)	66	<b>2. Infections of the lacrimal system</b>	<b>93</b>
2.1.2. Thrush (oropharyngeal candidiasis)	67	2.1. Dacryoadenitis	93
2.1.3. Herpes simplex viral infections of the oral cavity	67	2.2. Dacryocystitis	93
2.1.4. Cytomegalovirus mucositis	69	<b>3. Conjunctivitis</b>	<b>94</b>
2.1.5. Ramsay-Hunt syndrome	69	3.1. Neonatal conjunctivitis ( <i>Ophthalmia neonatorum</i> )	94
2.1.6. Human herpesvirus 8	70	3.2. Chlamydial conjunctivitis (Trachoma)	95
2.1.7. Oral hairy leucoplakia	70	3.3. Diagnosis of infectious conjunctivitis	95
2.1.8. Actinomycosis	70	3.4. Treatment of conjunctivitis	95
2.2. Tonsillopharyngitis	71	<b>4. Infectious keratitis</b>	<b>96</b>
2.2.1. Viral pharyngitis	72	4.1. Herpes simplex (type 1 and 2) viral keratitis	96
<i>Infectious mononucleosis (EBV)</i>	72	4.2. Herpes zoster ophthalmicus (VZV)	96
<i>Adenoviral pharyngitis</i>	75		

## Contents

4.3. Fungal keratitis	97	<b>11. Pneumonia</b>	<b>125</b>
4.4. Treatment of keratitis	97	11.1. Bacterial pneumonia	126
<b>5. Endophthalmitis</b>	<b>97</b>	11.2. Atypical (interstitial) pneumonia	129
<b>6. Uveitis</b>	<b>100</b>	11.2.1. <i>Mycoplasma pneumoniae</i>	129
6.1. Causes of uveitis in immunocompetent individuals	101	11.2.2. <i>Chlamydia pneumoniae</i>	130
6.2. Neonatal uveitis	103	11.2.3. <i>Chlamydia psittaci</i> (psittacosis)	130
6.3. Uveitis and retinitis in immunocompromised patients	104	11.2.4. <i>Coxiella burnetii</i> (Q fever)	131
6.4. Diagnostics in uveitis patients	105	11.2.5. <i>Legionella pneumophila</i> (Legionnaires' disease)	131
6.5. Treatment of uveitis	105	<b>12. Pleural effusion and empyema</b>	<b>133</b>
<b>D. INFECTIONS OF THE ORBIT AND PERIORBITAL STRUCTURES</b>	<b>105</b>	<b>13. Lung abscess</b>	<b>134</b>
<b>E. INFECTIONS OF THE EAR, MASTOID, AND SINUSES</b>	<b>106</b>	<b>14. Lung tuberculosis</b>	<b>136</b>
1. External otitis (swimmer's ear)	106	<b>15. Pertussis (whooping cough)</b>	<b>138</b>
2. Malignant external otitis (necrotising external otitis)	107	<b>VI. GASTROINTESTINAL INFECTIONS AND FOOD POISONING</b>	<b>143</b>
3. Acute middle ear inflammation (otitis media acuta)	108	<i>T. Skuhala, D. Lepur</i>	
4. Mastoiditis	109	1. Introduction	144
5. Sinusitis	109	2. Epidemiology	146
<b>V. RESPIRATORY TRACT INFECTIONS</b>	<b>115</b>	3. Pathogenesis of gastroenteritis	147
<i>T. Skuhala, D. Lepur</i>		4. Protective mechanisms	150
1. Introduction	116	5. Clinical presentation and complications of acute gastroenteritis	151
2. The common cold	118	6. Diagnosis	152
3. Acute respiratory syndrome	119	7. Treatment	153
4. Influenza (Flu)	119	8. Prevention of gastrointestinal infections	154
5. Acute laryngitis	122	9. Aetiology of gastroenteritis	154
6. Acute laryngotracheobronchitis (Croup)	122	10. <i>Helicobacter pylori</i>	154
7. Epiglottitis	123	11. Campylobacteriosis	156
8. Acute bronchitis	124	12. Salmonellosis	158
9. Bronchiolitis	124	12.1. Typhoid fever	160
10. Acute exacerbation of chronic obstructive pulmonary disease	125	13. Shigellosis	161
		14. Cholera	163
		15. Yersiniosis	164
		16. <i>Escherichia coli</i> enterocolitis	165
		17. Antibiotic-associated diarrhoea (pseudomembranous colitis)	166

## INFECTIOUS DISEASES

<b>18. Viral gastroenteritis</b>	<b>169</b>	<b>2. Classic viral exanthems</b>	<b>214</b>
18.1. Noroviruses	169	2.1. Varicella (chickenpox)	214
18.2. Rotavirus	170	2.2. Herpes zoster (shingles)	216
18.3. Adenovirus	171	2.3. Measles (Morbilli)	218
<b>19. Parasitic gastrointestinal diseases</b>	<b>171</b>	2.4. Exanthem subitum (Three-day fever)	221
19.1. Amoebiasis ( <i>Entamoeba histolytica</i> )	171	2.5. Erythema infectiosum (Megalerythema)	223
19.2. Other parasitic infections	173	2.6. Rubella (German measles)	224
<b>20. Food poisoning</b>	<b>173</b>	<b>3. Other viral exanthematous diseases</b>	<b>225</b>
20.1. Staphylococcal food poisoning	173	3.1. Eczema herpeticum	225
20.2. Poisoning by <i>Bacillus cereus</i> toxin	173	3.2. Enteroviral infections	226
20.3. Poisoning by <i>Clostridium</i> <i>perfringens</i> toxin	176	3.3. Dengue	227
20.4. Scombroid syndrome	176	<b>4. Rickettsial infections</b>	<b>227</b>
20.5. Mushroom poisoning (mycetism)	177	<b>5. Anaplasmosis and ehrlichiosis</b>	<b>229</b>

### VII. SKIN AND SOFT TISSUE INFECTIONS 181

*L. Stemberger Marić*

<b>1. Impetigo and ecthyma</b>	<b>187</b>	<b>7. Non-infectious febrile diseases with exanthema</b>	<b>231</b>
<b>2. Folliculitis</b>	<b>188</b>	7.1. Erythema nodosum	231
<b>3. Erysipelas, cellulitis, and skin abscess</b>	<b>188</b>	7.2. Kawasaki disease	232
<b>4. Surgical site infection</b>	<b>191</b>	7.3. Acute haemorrhagic oedema	234
<b>5. Erysipeloid</b>	<b>192</b>	7.4. Acute febrile neutrophilic dermatosis	235
<b>6. Necrotising infections</b>	<b>192</b>	7.5. Hypersensitive reactions	235
<b>7. Bite wounds</b>	<b>195</b>	7.6. Erythema multiforme	236
<b>8. Leprosy</b>	<b>195</b>	7.7. Stevens-Johnson syndrome and toxic epidermal necrolysis	236
<b>9. Herpes virus skin infections</b>	<b>196</b>		

### VIII. INFECTIOUS DISEASES WITH RASH 199

*L. Stemberger Marić, D. Lepur*

<b>1. Bacterial diseases with rash</b>	<b>202</b>	<b>IX. URINARY TRACT INFECTIONS 241</b>	
1.1. Staphylococcal scalded skin syndrome	202	<i>V. Škerk</i>	
1.2. Staphylococcal toxic shock syndrome	204	<b>1. Introduction</b>	<b>242</b>
1.3. Streptococcal toxic shock syndrome	205	<b>2. Definitions and classification</b>	<b>242</b>
1.4. Staphylococcal sepsis and infective endocarditis	206	<b>3. Epidemiology and aetiology</b>	<b>244</b>
1.5. Meningococcal sepsis	207	<b>4. Pathoanatomic characteristics</b>	<b>245</b>
1.6. Pseudomonas sepsis	210	<b>5. Pathogenesis</b>	<b>245</b>
1.7. Leptospirosis	210	<b>6. Diagnosis</b>	<b>246</b>
1.8. Lyme disease	210	<b>7. Antimicrobial treatment</b>	<b>247</b>
1.9. Syphilis	213		

### X. HEPATOBILIARY INFECTIONS 255

*L. Stemberger Marić, D. Lepur*

<b>1. Introduction</b>	<b>256</b>
------------------------	------------

<b>2. Viral hepatitis</b>	<b>259</b>
2.1. Hepatitis A	259
2.2. Hepatitis E	261
2.3. Hepatitis B	263
2.3.1. Acute hepatitis B	263
2.3.2. Chronic hepatitis B	265
2.4. Hepatitis D	268
2.5. Hepatitis C	269
2.5.1. Acute hepatitis C	270
2.5.2. Chronic hepatitis C	270
2.6. Hepatitis G virus	272
<b>3. Other infectious liver diseases</b>	<b>273</b>
3.1. Granulomatous hepatitis	273
3.2. Cholecystitis	274
3.3. Liver abscess	274
3.4. Perihepatitis (Fitz-Hugh-Curtis syndrome)	275
3.5. Bacillary peliosis	275

## XI. SEXUALLY TRANSMITTED INFECTIONS 279

V. Škerk

<b>1. Introduction</b>	<b>280</b>
<b>2. Genital herpes</b>	<b>281</b>
2.1.1. Genital herpes in pregnancy	282
<b>3. Nongonococcal urethritis and mucopurulent cervicitis</b>	<b>283</b>
<b>4. Vaginal discharge syndrome</b>	<b>284</b>
4.1.1. Bacterial vaginosis	284
4.1.2. Trichomoniasis	284
4.1.3. Vulvovaginal candidiasis	285
<b>5. Infections caused by chlamydia</b>	<b>285</b>
5.1. Infections caused by <i>Chlamydia trachomatis</i>	287
5.1.1. Infections of the genitourinary system in women	288
5.1.2. Infections of the genitourinary system in men	288
5.1.3. Lymphogranuloma venereum (LGV)	288
<b>6. Syphilis (lues)</b>	<b>290</b>
<b>7. Gonorrhoea</b>	<b>292</b>

## XII. INFECTIONS IN IMMUNOCOMPROMISED PATIENTS 297

L. Stemberger Marić, D. Lepur

<b>1. Primary immunodeficiencies</b>	<b>300</b>
1.1. Antibody production disorders	300
1.1.1. X-linked agammaglobulinaemia	300
1.1.2. Hypogammaglobulinaemia	300
1.1.3. Hyper-IgM syndrome	300
1.2. T-cell disorders	301
<b>2. Specific (acquired) immunodeficiency</b>	<b>303</b>
2.1. Infections in cellular immunodeficiency	303
2.1.1. <i>Pneumocystis jirovecii</i> pneumonia	303
2.1.2. <i>Cryptococcus neoformans</i> infections	305
2.1.3. Infections of atypical mycobacteria	305
2.1.4. Cytomegalovirus infections	305
2.2. Infections in humoral immunodeficiency	306
2.3. Infections in neutropenic patients	306
2.3.1. Bacterial infections	306
2.3.2. Fungal infections	307
2.4. Phagocytic disorder	308
2.5. Complement disorder	308
2.6. Infections in transplant recipients	309
2.6.1. Bone marrow transplantation	309
2.6.1. Prophylaxis of infection in bone marrow recipients	309
2.6.2. Solid organ transplantation	311
2.7. Infections in diabetics	312
2.8. Infections in splenectomised patients	314
2.9. HIV - disease	315
2.10. Malnutrition	321

## XIII. PERIPARTAL AND INTRAUTERINE INFECTIONS 323

L. Stemberger Marić, D. Lepur

<b>1. Introduction</b>	<b>324</b>
<b>2. Viral infections</b>	<b>327</b>
2.1. Cytomegalovirus	327
2.2. Parvo B19 virus	329
2.3. Hepatitis B virus	330
2.4. Hepatitis C virus	331

## INFECTIOUS DISEASES

2.5. HIV infection	332	5.2. Meningoencephalitis	391
2.6. Rubella	333	5.2.1. Herpes simplex virus encephalitis	392
2.7. Varicella	334	5.2.2. Varicella-zoster virus meningoencephalitis	395
2.8. Genital <i>Herpes simplex</i> infections	335	5.2.3. Tick-borne meningoencephalitis	397
2.9. Enteroviruses	336	5.2.4. Rhombencephalitis	399
2.10. Congenital Zika syndrome	337	5.3. Acute myelitis	400
<b>3. Parasites</b>	<b>337</b>	5.4. Brain abscesses	402
3.1. Malaria	337	<b>6. Diseases caused by bacterial neurotoxins</b>	<b>408</b>
3.2. Toxoplasmosis	337	6.1. Tetanus	408
<b>4. Bacterial infections</b>	<b>339</b>	6.2. Botulism	412
4.1. Congenital syphilis	339		
4.2. Gonococcal infections	340		
4.3. <i>Chlamydia trachomatis</i>	341		
4.4. Neonatal sepsis	341		
4.5. Group B beta-haemolytic <i>Streptococcus</i>	344		
4.6. Listeriosis	345		
<b>5. Other common infections of the neonate</b>	<b>346</b>		
<b>6. Infections of breastfeeding women</b>	<b>346</b>		
<b>XIV. SEPSIS 350</b>		<b>XVII. RECREATIONAL INFECTIONS 421</b>	
<i>D. Lepur</i>		<i>T. Skuhala</i>	
<b>XV. INFECTIVE ENDOCARDITIS 357</b>		<b>1. Introduction</b> 422	
<i>D. Lepur</i>		<b>2. Travel</b> 422	
		2.1. Infections during travel 423	
		2.1.1. Contaminated food and water 423	
		2.1.2. Respiratory infections 423	
		2.2. Infections upon arrival at the destination 424	
		2.2.1. Travellers' diarrhoea 424	
		2.2.2. Diseases transmitted by arthropods 426	
		<i>Malaria</i> 426	
		<i>Other diseases transmitted by arthropods</i> 429	
		2.2.3. Haemorrhagic fevers 429	
		2.2.4. Leishmaniasis 432	
		<b>3. Contact with animals</b> 432	
		3.1. Diseases related to cats 432	
		3.2. Diseases related to dogs 433	
		3.3. Diseases related to other animals 435	
		<b>4. Open-air activities</b> 437	
		4.1. Climbing and camping 437	
		4.2. Vector stings and bites 437	
		4.3. Skin exposure to sand and soil 438	
		<b>5. Water activities</b> 438	
		<b>6. Contact sports</b> 440	
<b>1. Introduction</b> 366		PHOTO CREDITS 443	
<b>2. Anatomy and pathophysiology</b> 369		GLOSSARY 445	
<b>3. Pathogenesis of infectious diseases of the CNS</b> 375			
<b>4. Complications of CNS infections</b> 377			
<b>5. Common clinical syndromes</b> 377			
5.1. Meningitis 380			
5.1.1. Acute aseptic meningitis 381			
5.1.2. Acute bacterial meningitis 384			
5.1.3. Chronic meningitis 386			
<i>Chronic neuroborreliosis</i> 386			
<i>Tuberculous meningitis</i> 387			
<i>Fungal meningitis</i> 389			
5.1.4. Recurrent meningitis 390
